DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 7-9, filed May 6, 2004, with respect to 35 USC 103 rejection of claims 1-13 have been fully considered and are persuasive. The rejection of claims 1-13 has been withdrawn.

After a closer review of applicant's arguments pertaining to the cited Thornton reference, in particular to the wavelength control disclosed by Thornton, which is describe as removing layers from the active region see column 4 lines 48-58.

Response to Amendment

Based on applicant's amendment of claims 1,6 and 13 filed May 6, 2004, the 35 USC 112 second paragraph has been withdrawn.

Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

After reviewing applicant's amendment, arguments and conducting an updated search none of the cited prior arts alone or in combination discloses the claimed multiple wavelength surface emitting laser having the recited limitations of independent claims 1,6 and 13, where the resonance wavelength is controlled by adjusting the thickness of the dielectric layer to obtain a multiple wavelength surface emitting laser of predetermined wavelengths and thereby allowing for a simple and highly reliable manufacturing process.
